

Larry Miguel R. Cueva

larrymiguelcueva@gmail.com | (+63) 970-745-1021 | github.com/08Aristodemus24 | https://project-alexander.vercel.app/

TECHNICAL SKILLS

Languages & Tools: Python | SQL | PostgreSQL | PowerBI | Excel | Git | Docker | Linux
Data Frameworks: Tensorflow | Keras | Scikit-Learn | Numpy | Pandas | Matplotlib | NLTK | Selenium
Web Frameworks: Flask | React | Svelte | Django
Core Competencies: Data Cleaning & Preprocessing | Exploratory Data Analysis & Visualization | Natural Language Processing | Signal Processing | Data Collection | Machine Learning | Deep Learning | Data Structures & Algorithms | Front End & Back End Web Development

EXPERIENCE

- Virtuals Protocol** Dec 2024 - Jan 2025
Customer Support Engineer, Intern
- Troubleshot automatic HTTP request of agent to X/twitter API endpoints problem cases faced by clients building RAG Agents
 - Developed and authored guides for clients/builders how to create their own custom functionalities for their respective agent i.e. automatic image generation using OPEN AI API, posting tweets on X using X API, etc.
- Data Engineer, Intern* Dec 2024 - Dec 2024
- Cleaned, preprocessed, and ingested data for RAG AI agents.
 - Developed and wrote shell scripts that automated data ingestion processes of RAG AI agents
 - Led a small team of Data Engineers to automate the process of pulling raw datasets uploaded by users for later data preprocessing and ingestion
- Creative Dynamix Solutions, Inc.** Sep 2022 - Oct 2022
X++ Developer, Intern
- Developed and queried data reports using X++

PROJECTS

- eda-denoiser-stress-detector** | *React.js, D3.js, Flask, Scikit-Learn, Tensorflow, Docker*
- Trained a hybrid deep learning model (LSTM-SVM) to denoise (remove artifacts from) electrodermal activity signals detect points of stress in the signals of an individual
 - Developed a web app to using React and Flask to integrate the trained LSTM-SVM to denoise electrodermal signals and detect stress
- project-alexander** | *Svelte.js, Flask, Leonardo.AI, Manim*
- Developed a portfolio website in Svelte and Flask compiling all my machine learning and deep learning projects. Link to portfolio: <https://project-alexander.vercel.app/>
- LaRJ-Corpus** | *Selenium, BeautifulSoup, Pandas*
- Curated an experimental dataset of Labor Related Jurisprudence Corpora of the Philippine Justice System for legal recommendation systems using OpenAI's GPT-3.5 API.
 - Scraped additional Labor Related Rules and Regulations from Chan Robles web page using Selenium
- hate-speech-classifier** | *Tensorflow, Numpy, Matplotlib, Pandas, ScikitLearn*
- Implemented Softmax Regression and Bidirectional LSTM algorithms in Tensorflow to detect online hate speech & rhetoric in the internet using the Reddit & Twitter hate speech datasets.

EDUCATION

- Polytechnic University of the Philippines** Aug 2019 - Mar 2025
Bachelor of Science in Computer Science
- 2.1 GPA
