SUMMARY

A recent Computer Science major, driven to learn more about Big Data & Data Science technologies. I am an analytical thinker, skilled in analyzing and visualizing data as well as developing predictive models for data analytics. The recent projects & internships I had allowed me to learn more about big data processes and I believe it would be beneficial for the junior roles in Data Science or Analytics I am currently seeking

EXPERIENCE

Virtuals Protocol <i>Data Engineer, Intern</i>	Dec 2024 – Jan 2025
<ul style="list-style-type: none">Cleaned and processed more than 500k rows of data for various retrieval augmented generated (RAG) AI agents.Developed and wrote scripts automating data ingestion processes of RAG AI agents and pulling raw datasets uploaded by users diverting main workflow to data transformation.	
Creative Dynamix Solutions, Inc. <i>X++ Developer, Intern</i>	Sep 2022 – Oct 2022
<ul style="list-style-type: none">Utilized AnyDesk in tunneling through remote virtual machine for reporting tasksDeveloped and queried data to enhance sales reporting using PowerBI and X++	

PROJECTS

eda-denoiser-stress-detector <i>React.js, D3.js, Flask, Scikit-Learn, Tensorflow, Docker</i>
<ul style="list-style-type: none">Enhanced the accuracy and reliability of bio-signal denoising and stress detection by developing a novel hybrid LSTM-SVM deep learning model, addressing critical challenges in bio-signal data analysis. Link to research: https://aristodemus8-eda-denoiser-stress-detector.hf.space/Engineered and deployed a full-stack web application demonstrating the utility and potential of the validated LSTM-SVM model in real world health monitoring applications.Validated model performance of 90% AUC & 78% accuracy in biosignal denoising, providing a robust foundation and methodology for future bio-signal research and potential diagnostic tools.
project-alexander <i>Svelte.js, Flask, Leonardo.AI, Manim</i>
<ul style="list-style-type: none">Designed and deployed a full-stack portfolio website to centralize and present data science projects for recruiters to evaluate, demonstrating technical skills and project execution across data analytics & machine learning. Link to portfolio: https://project-alexander.vercel.app/
chronic-disease-analyses <i>SQL, PowerBI, Apache Spark, Airflow, Selenium, S3, DuckDB, Docker</i>
<ul style="list-style-type: none">Processed and transformed 20 years of comprehensive US public health data (from 2001-2021) using Spark, consolidating disparate datasets to quantify chronic disease cases and population figures. Link to project: https://chronic-disease-analyses.vercel.app/Conducted analysis of chronic disease data to identify most prevalent disease, allowing for potential in more targeted interventions and improving cost efficiency for less prevalent diseases

TECHNICAL SKILLS

Core Competencies: Data Analysis Data Visualization Data Cleaning/Preprocessing Data Modelling Web Scraping Data Warehouses KPIs Reporting
Languages & Tools: Python SQL PowerBI Excel Git

EDUCATION

Polytechnic University of the Philippines <i>Bachelor of Science in Computer Science</i>	Aug 2019 – Mar 2025
<ul style="list-style-type: none">1.9 GPA
