# Larry Miguel R. Cueva

larrymiguelcueva@gmail.com | (+63) 970 745 1021 | https://www.linkedin.com/in/michaelcueva | https://github.com/08Aristodemus24

#### **TECHNICAL SKILLS**

Core Competencies: Data Analysis & Visualization | Data Cleaning & Preprocessing | Web Scraping | Data

Warehouses

Languages & Tools: Python | SQL | PowerBI | Excel | Git | Linux | Docker | S3

Frameworks: Apache Spark | Selenium | Apache Airflow | Pandas | Numpy | Matplotlib

#### **EXPERIENCE**

Virtuals Protocol Dec 2024 – Jan 2025

Data Engineer, Intern

 Cleaned and processed more than 500k rows of data for various retrieval augmented generated (RAG) Al agents.

 Developed and wrote scripts automating data ingestion processes of RAG AI agents and pulling raw datasets uploaded by users diverting main workflow to data transformation.

## **Creative Dynamix Solutions, Inc.**

Sep 2022 - Oct 2022

X++ Developer, Intern

- Utilized AnyDesk in tunneling through remote virtual machine for reporting tasks
- Developed and queried data to enhance sales reporting using PowerBI and X++

#### **PROJECTS**

eda-denoiser-stress-detector | React.js, D3.js, Flask, Scikit-Learn, Tensorflow, Docker

- Enhanced the accuracy and reliability of bio-signal denoising and stress detection by developing a
  novel hybrid LSTM-SVM deep learning model, addressing critical challenges in bio-signal data
  analysis. Link to research: <a href="https://aristodemus8-eda-denoiser-stress-detector.hf.space/">https://aristodemus8-eda-denoiser-stress-detector.hf.space/</a>
- Engineered and deployed a full-stack web application demonstrating the utility and potential of the validated LSTM-SVM model in real world health monitoring applications.
- Validated model performance of 90% AUC & 78% accuracy in biosignal denoising, providing a robust foundation and methodology for future bio-signal research and potential diagnostic tools.

## project-alexander | Svelte.js, Flask, Leonardo.Al, Manim

 Designed and deployed a full-stack portfolio website to centralize and present data science projects for recruiters to evaluate, demonstrating technical skills and project execution across data analytics & machine learning. Link to portfolio: <a href="https://project-alexander.vercel.app/">https://project-alexander.vercel.app/</a>

chronic-disease-analyses | SQL, PowerBI, Apache Spark, Airflow, Selenium, S3, DuckDB, Docker

- Processed and transformed 20 years of comprehensive US public health data (from 2001-2021)
  using Spark, consolidating disparate datasets to quantify chronic disease cases and population
  figures. Link to project: <a href="https://chronic-disease-analyses.vercel.app/">https://chronic-disease-analyses.vercel.app/</a>
- Conducted analysis of chronic disease data to identify most prevalent disease, allowing for potential in more targeted interventions and improving cost efficiency for less prevalent diseases

## **EDUCATION**

### **Polytechnic University of the Philippines**

Aug 2019 - Mar 2025

Bachelor of Science in Computer Science
